

PRANAY SIDDHARTHA TAMADA

Full Stack Developer

Hyderabad, Telangana | +91 6301652610 | pranay.tamada@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Full-Stack Developer with hands-on experience in MERN stack development, Python, SQL, and database-driven applications. Skilled in building REST APIs, authentication systems, and responsive web interfaces, with growing expertise in Docker, Kubernetes, and LLM Integration. Strong problem-solving and software engineering fundamentals with a focus on building scalable real-world applications.

Education

Bachelor of Technology in Computer Science and Engineering

Hyderabad, India

JB Institute of Engineering and Technology | GPA: 8.4 / 10 | Expected 2027

Technical Skills

Languages: C, Java, JavaScript, Python

Frontend: React, Next.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express, Django, Flask, FastAPI

Databases: MongoDB, SQL, PostgreSQL

DevOps & Version Control: Docker, Kubernetes, Git, GitHub

Projects

Conversational SIEM Copilot - Python Full Stack + AI Integration

Apr 2026

- Built a natural-language security log analysis tool using Next.js, FastAPI, and SQLite, enabling analysts to query logs conversationally.
- Implemented multi-incident threat segmentation to classify and analyze 1,000+ simulated security events, and designed an interactive analytics dashboard with 5+ visualization modules covering attack timelines, incident summaries, threat distribution, and log statistics.

Live demo: conversational-siem-copilot-ten.vercel.app/

Smart Parking System - MERN Stack

May 2026

- Developed a full-stack smart parking platform with real-time parking slot availability, vehicle booking, and an admin dashboard for parking and reservation management.
- Built 10+ RESTful API endpoints for user authentication, parking slot management, bookings, and admin operations, with MongoDB supporting 100+ parking and booking records through efficient CRUD operations.

Live demo: smart-parking-system.vercel.app

Restaurant Reservation System - MERN Stack

Jun 2026

- Developed a full-stack reservation platform with a customer-facing booking flow and an admin dashboard for table and reservation management.
- Built 10+ RESTful API endpoints for authentication, reservation management, and admin operations, and integrated MongoDB to support 100+ reservation records with efficient CRUD operations.

Live demo: restaurant-reservation-system-red-seven.vercel.app

AI SendGuard - Python Full Stack + AI Integration

Jul 2026

- Developed an AI-powered email security platform using Next.js, FastAPI, and Groq LLM to detect sensitive information and prevent accidental data leakage before emails are sent.
- Implemented real-time risk analysis with intelligent PII detection, document scanning, and contextual AI validation, processing 100+ test emails across multiple risk categories with sub-2 second response times.

Certifications

IBM Professional Full Stack Software Developer — IBM

June 2026

Awards & Recognition

- 6-Star Problem Solver in Data Structures & Algorithms, HackerRank — Global Rank 18,616 (2025)
